Internship IIT KANPUR

.Implemented effecient data structures and algorithms in C++ to solve complex problems, improving time and space optimization.

.Gained hands- on experience in problem-solving ,coding and algorithm design through practical application during internship.

Skills

Web Technologies: Html, Css, JavaScript, Tailwind Css, Node.js, Express.js, REST APIs, Socket.IO

Database: MongoDB , Mongoose

Tools and Platforms: VS Code , Linux, Postman, Vercel, Render, MongoDB Atlas, Appwrite, Cursor

Projects

DevTinder | *REACT, NODEJS, EXPRESS, MONGODB, SOCKET.IO, TAILWINDCSS* **May 2026**

- Built a full-stack developer networking platform inspired by Tinder with authentication, profile matching, and real-time chat functionality.
- Implemented JWT authentication with HTTP-only cookies, protected routes, profile editing, connection requests, and match-based messaging system.
- Developed real-time one-to-one chat using Socket.IO and deployed the frontend and backend separately using Vercel and Render.
- **Vercel:** Live

Mega Blog | *REACT , TAILWINDCSS , APPWRITE* **Feb 2026**

- Mega Blog is a platform where you can login with your credentials and perform CRUD operations .
- **Vercel:** Live

Chefexa-ai-generated-recipe | *REACT, CSS* **March 25, 2026**

- Chefexa, an AI-powered recipe generator using the Gemini API that creates recipes based on user-provided ingredients.
- **Vercel:** Live

Awards & Certifications

- **Internal Smart India Hackathon (SIH) Qualifier – 2025:**Successfully qualified for the internal-level SIH by developing a robust solution prototype during the rigorous internal screening process.
- **Webathon Winner (First Place) – 2025:** Led development of a fully functional, responsive website that met all technical and design criteria within a 5-hour competition window.
- **Technical Quiz Competition (First Place)– 2025:** Achieved top ranking by demonstrating advanced proficiency in core technical concepts (e.g., Data Structures, Algorithms, or specific programming language).
